VOCAL TECHNIQUE

HOLD MICROPHONE
CORRECTLY

HOW TO FIND THE "SWEET SPOT" ON THE MICROPHONE?

STEP 1

Move the mic around and listen to how you sound. Find the spot your voice sounds most natural

STEP 2

Mics held close to your mouth will make you sound more personal. Can lead to the proximity effect, adding warmth to your voice

STEP 3

Mics held away from your mouth will require you to project. This will make you sound more authoritative.
